### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Amendment***

Applicants' amendment filed June 16, 2004 has been thoroughly reviewed and considered by the examiner. In view of applicants' persuasive arguments, the prior rejection of claim 1 under 35 U.S.C. 102(b) as being anticipated by Moles (U.S. Patent No. 5,932,799) and the rejection of claims 2-4 as being unpatentable under 35 U.S.C. 103(a) over Moles are hereby withdrawn.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-11 and 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Further review of the specification, particularly Figures 72 and 75 of the drawings, is not considered to disclose the invention as recited in claims 1, 11 and 16, particularly a first and second elastomer layer bearing in a first and second recess, respectively, the second recess having an arched ceiling.

It is noted that the specification is quite lengthy. It is respectfully requested that applicant point out the page and line number in the specification section describing the microfluidic structure comprising a first and second elastomer layer, the first elastomer layer bearing in a bottom surface a first recess and the second elastomer layer bearing in a bottom surface a second recess having an arched ceiling.

### ***Drawings***

The drawings are objected to because the lines, numbers and letters are not uniformly thick and well defined (poor line quality) in Figures 71A, 71B, 72, 73A-73C, 74-79, 80A, 80B, 81 and 82A-82C. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the

Art Unit: 3753

examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
